Release Notes

Ver. 6.0.2 | July 25th 2015

Cloud Shared Office ECM for Salesforce

Bug Fixes

File Viewer

There was a problem that the up-loaded file became a waiting state without converting, and the loading screen kept being displayed. This problem was fixed.

File Search

It occasionally became like the retrieval result's not being displayed when it took time for the retrieval usually. This problem was fixed.

CSO Related List

The problem in failing to generate a Visualforce page when API reference name of the corresponding object is more than 19 characters in a new CSO related list page is already fixed.
