## Cloud Shared Office Sync

### Bug Fixes

#### Sync Space Selection Tree View

Fixed a bug in the tree view of the sync settings tab of a client wherein the display of a tree is not ordered by name.

#### Manual is Deleted when Restarting Sync

Fixed a problem wherein a downloaded manual in the sync folder of a client is deleted when the sync is restarted.

#### Re-download during Manual Sync

Files that are deleted in the sync folder of a client are re-downloaded when performing manual sync. The problem that occurs when re-downloading these files has already been fixed.

#### Moving files in the Sync Folder

If a sync folder's subfolders are opened while moving files in the sync folder, an error occurs and the files are moved partially. In order to avoid this, the system now returns the moved files back to their original location.
