Cloud Shared Office / WebReport

Enhancements

CSO Function added

COUNTIF(<<PARAM>>,[expression]•••)

I will count the number of << PARAM >> data that meets the conditions.

Conditional expression is up to 10, AND and OR conditions can also be specified

SUMIF(<<PARAM>>,[expression]•••)

I will count the aggregation of << PARAM >> that match the conditions.

Conditional expression is up to 10, AND and OR conditions can also be specified

Excel overlay, I was officially support the sheet non-display setting

Sheet of non-display setting on Excel does not appear.

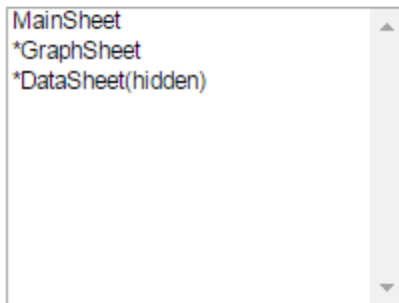

Hidden sheet is explicitly displayed in the form definition

You want to use a graph, but the data is available, for example, if you do not want to display.

Selectable sheets

BugFix

- Error occurs in the Math functions such as Math.floor () of CSO function.
- If you use the sub-report to a fixed document to Excel output sub report is shifted.
- When Excel outputs utilizing overlay multiple shapes are arranged, broken Excel file is generated
There are times when
- The height of the detail records is set to 0, not returned is a response generating form using parameters filldetail
- There are times when that does not come out a list of store space in the ECM storage process of the BOX
- It is not possible to generate a form in Excel generation process single BOX
- Excel sheet on the sub-report only uses the overlay that does not exist was broken to Excel output
Excel file is generated
- It is not converted to be used \$ SYSDATE variable in the user field
- Is slow display of screen when trail management trail has accumulated
