BugFix

- There is a case in which broken when you use the filldetail and colnum parameters in the sub-report-only sheet Excel files can be
- Setting a string of sub-report, it would remain intact when there is no data in the sub-report destination cell.
- Unexpected error exits and put the numeric functions in System Settings column without page layout without first line of data without first row
- Slow When multiple pages output in multiple pages 1 sheet in Excel output
- 2 and subsequent pages print area does not work when multiple pages output in cyclic fixed form
- When you use the OVLPAGE NUMBER variable in plug in a conditional page breaks in the form definition, page number is shifted.
